

Welcome to the EMMT Community

What is Elon Musk Meme Token ? Here is a quick resume :

First, this is a meme. Since day one and will always be.

This is experimental ; We want it to work.

Genesis :

Two friends, who wanted to create a nice crypto community for sharing advice and helping newbies. We can't do this alone, so we need a community. Every idea is welcome and everyone can contribute by sharing tutorials or news from the crypto world. This is the main goal.

Why ELON MUSK ?

Honestly, we wanted to bring attention to our projects. Cryptocurrencies projects nowadays are popping from everywhere, multiple scams occurring every day...

We had to choose a powerful name.

We will stay anonymous, we don't want to bring much attention to ourselves for the moment, please respect that.

In the future, if our projects become more known, we may need some people to help us move forward.

We speak English and natively French, as we're Europeans.

Why a token then ?

Once and for all, this \$ELONMUSK token is not another DeFi farming / staking / high APY project.

It's only a tradable asset, having his value growing by buyback mechanics exposed briefly below.

Tokenomics :

ONLY available on PancakeSwap, the pool was opened with 100% supply of 10M Tokens, and the LP tokens were burned. **No rugpull can ever.be.done.**

[BSCScan Token Page](#) - [PancakeSwap Trade](#) - [Chart Astrotools](#) - [ChartEx Pro](#)

Incentives :

As of today, there is no use case for this token other than the Meme. The smart contract has no special functions and can be quickly audited.

"How valuable will it be then, why should I buy some ?"

"Pretty" simple, we have 3 other projects to come :

One is a token that will create value and profits itself by tokenomics and trading.
Two others will create profits by use case. (Obviously too early to disclose more informations today)

A small percentage will be taken from those 3 projects transactions as profits and ~50% will be used to buyback \$ELONMUSK token, then will be added with remaining BNB tokens to the PancakeSwap pool, and LP tokens will be burned, weekly or monthly. This will lock liquidity forever, increase the token's value and create inflection.

Yes, it means that when you simply hold \$ELONMUSK tokens, their value will grow without doing anything but HODL them. The earlier you own \$ELONMUSK, the greatest will be your ROI.

***Those features and projects are still on paper and will
NOT
being released really soon.***

This Lightpaper is a version 2.
